

Muhammad Tanveer Abbas

SaaS MVP Developer | AI Specialist | Full Stack Developer

Profile Summary

I build secure, scalable, high performance SaaS applications for startups, founders, and product owners. Leveraging AI powered solutions, rapid prototyping, and streamlined MVP development, I deliver investor ready SaaS products in weeks, not months.

Skillset

- **Full Stack Development:** Next.js, Tailwind CSS, Supabase, UI Libraries
- **Cloud & Deployment:** Git & Github, Vercel, Firebase, Cloudflare
- **SaaS Expertise:** MVP architecture, rapid development, scaling, monetization
- **AI Integration:** AI powered SaaS solutions, automation, data driven features
- **Business Focus:** Authentication & security, payments integration, product market fit

Work Experience

FinTech SaaS – Investment Portfolio Tracker

April 2025 – July 2025

- Built an SEC compliant MVP for an ex Goldman Sachs trader.
- Delivered real time stock data, automated compliance reporting, MFA, and security.
- Enabled client to secure **\$50K in seed funding**.

EdTech SaaS – Online Course Marketplace

January 2024 – March 2024

- Developed video based learning marketplace with Cloudflare Stream and LemonSqueezy payments.
- Implemented student engagement tracking and seamless video playback.
- Achieved **1,000+ student enrollments in the first Quarter**.

Healthcare SaaS – Telemedicine & Scheduling Platform

October 2024 – December 2024

- Built HIPAA compliant SaaS with encrypted EHR storage, Twilio video integration, and insurance APIs.
- Delivered in under 2 weeks, enabling doctor to launch on time.
- Generated **\$25K MRR within 90 days**.

AI Startup – Customer Support Automation

July 2024 – September 2024

- Engineered AI chatbot with GPT powered NLP, automated ticket routing, and CRM integration.
- Reduced support response times by **70%** and boosted customer satisfaction scores by **40%**.
- Scaled system to handle **10K+ monthly support interactions** without additional headcount.
