Jan 2020 | Faisalabad,Pk

## Skillsets

### Full Stack Development

Next.Js Ecosystem Development  
Tailwind CSS & Modern UI Libraries  
Supabase & MongoDB (Scalable Databases)  
Cloud Native Deployment (Vercel, Firebase)  
SaaS MVP Architecture & Scaling

### SaaS MVP Expertise

Rapid MVP Development  
AI Powered SaaS Solutions  
Scalable SaaS Architectures  
Authentication & Security  
Payments & Monetization  
Market Validation & Product Market Fit  
Customer Acquisition & Retention  
Revenue Optimization & Scaling

## Work Experience

### FinTech Startup | Investment Portfolio Tracker

Apr 2025 – Jul 2025

**Problem:** A former Goldman Sachs trader needed a fully functional MVP with SEC compliance to pitch investors. The timeline was just 12 days, leaving no room for missteps.  
**Solution:** Designed and delivered an investment platform with real time stock data, automated compliance reporting, multi factor authentication, and bank grade security. Built for both speed and regulatory alignment.  
**Result:** The MVP enabled the client to secure \$50K in seed funding, validating the concept and opening the door for further investment.

### EdTech Platform | Online Course Marketplace

Jan 2025 – Mar 2025

**Problem:** An educator turned entrepreneur wanted to launch an online learning marketplace capable of streaming high quality video, handling recurring payments, and tracking student engagement. The challenge was ensuring smooth performance at scale.  
**Solution:** Developed a robust course marketplace with Cloud flare Stream for video delivery, progressive video loading for seamless playback, Lemon Squeezy subscription management, and custom student progress tracking.  
**Result:** he platform attracted 1,000+ student enrollments in its first month, proving market demand and establishing early traction.

### Healthcare SaaS | Patient Scheduling & Telemedicine

Oct 2024 – Dec 2024

**Problem:** A practicing doctor envisioned a SaaS platform for scheduling and telemedicine but required strict HIPAA compliance and a launch ready product within two weeks.  
**Solution:** Built secure SaaS with encrypted EHR storage, Twilio video integration, and insurance verification APIs.  
**Result:** Achieved \$25K MRR within 90 days of launch.
